

09. MEDIUM VOLTAGE CIRCUIT BREAKER (TESTING & COMMISSIONING)

COURSE CODE : MVCB || 2 DAYS

This two-day course combines theory, demonstrations, and hands-on practice, delivered by experienced instructors to provide a comprehensive understanding of circuit breaker roles in electrical power systems up to 33kV. The course covers maintenance, testing, and proper management practices to enhance equipment performance, improve safety, and reduce operational costs.

COURSE CONTENT

- Type of Maintenance
- Routine testing, SAT and FAT
- Insulation resistance test
- Contact Resistance Test
- DAR & PI test
- Current Injection Tests
- High-Pot Test
- Vacuum Interrupter Integrity Test
- Testing equipment
- Functional Test

RECOMMENDED FOR

- Student in Engineering
- Graduate in Engineering
- Technicians
- Electricians
- Chargemen
