

21. INFRARED THERMOGRAPHY

COURSE CODE : none || 1 DAYS

Infrared thermography is an essential tool for identifying electrical system problems before they lead to failures. This course will provide you with the knowledge and practical skills to use infrared cameras for inspecting electrical components, ensuring system reliability and safety.

COURSE CONTENT

- Introduction to Infrared Thermography for Electrical Systems
- Infrared Cameras for Electrical Inspections
- Conducting Electrical Inspections
- Analyzing and Interpreting Thermal Images
- Practical Session: Hands-On Thermography
- Implementing a Thermography Program for Electrical Systems

RECOMMENDED FOR

- Electrical Engineers
- Maintenance Technicians
- Facility Managers
- Electricians
- Energy Auditors
- Safety Inspectors
- Anyone responsible for electrical system maintenance
